

SAFETY DATA SHEET

Gilt Wax Medium

Product: Gilt Wax Medium

Product Codes: 5217-01, 5217-02, 5217-03, 5217-04

Supplier: Wrights of Lymm Ltd

Recommended Use: Medium for metallic/bronze powders and protective decorative coating

Issue Date: 15 September 2026

Version: 1.0

SECTION 1: Identification of the Substance/Mixture and Company

1.1 Product Identifier

Product Name: Gilt Wax Medium

1.2 Relevant Identified Uses

Decorative medium for use with metallic and bronze powders.

May be used:

- As a medium mixed with burnishable bronze powders
- For touching up damaged gilding
- For decorative gilt finishes
- For highlighting raised areas
- As a protective coating/varnish on suitable decorative surfaces

1.3 Supplier

Wrights of Lymm Ltd

Wright House
Crouchley Lane
Lymm
Cheshire
WA13 0AS
United Kingdom

Telephone: 01925 754368

Email: info@wrightsoflymm.co.uk

Website: www.wrightsoflymm.co.uk

SECTION 2: Hazards Identification

A definitive UK CLP classification **cannot be assigned without confirmation of the current formulation and constituent substances.**

Users should therefore observe standard precautions applicable to decorative coating and wax-medium products.

General Precautions

- Keep out of reach of children.
- Avoid contact with eyes.
- Avoid prolonged or repeated skin contact.
- Do not ingest.
- Use in a suitably ventilated area.
- Keep container closed when not in use.
- Keep away from unnecessary heat and ignition sources until flammability classification has been confirmed.

CLP Classification: To be confirmed from formulation/supplier data.

Signal Word: Not assigned pending formulation confirmation.

Hazard Statements: Not assigned pending formulation confirmation.

SECTION 3: Composition / Information on Ingredients

Product Type: Decorative wax/coating medium.

The precise composition and concentration of ingredients must be confirmed from the product formulation or original manufacturer's information.

No specific hazardous ingredients should be declared in this section without supporting formulation data.

SECTION 4: First Aid Measures

4.1 Eye Contact

Rinse cautiously with clean water for several minutes.

Remove contact lenses if present and easy to do.

Continue rinsing.

Seek medical advice if irritation persists.

4.2 Skin Contact

Wash affected skin thoroughly with soap and water.

Remove contaminated clothing.

Seek medical advice if irritation develops or persists.

4.3 Inhalation

Under normal application conditions significant inhalation exposure should be avoided by maintaining adequate ventilation.

If discomfort occurs, move the affected person to fresh air.

Seek medical attention if symptoms persist.

4.4 Ingestion

Rinse mouth.

Do not induce vomiting unless instructed by medical personnel.

Seek medical advice if a significant quantity has been swallowed or the person feels unwell.

SECTION 5: Firefighting Measures

The product's definitive flash point and flammability classification have not been confirmed.

Suitable Extinguishing Media

Select extinguishing media appropriate for the surrounding fire, such as:

- Foam
- Dry chemical powder
- Carbon dioxide
- Water fog

Fire Precautions

- Avoid unnecessary exposure to heat and flames.
- Keep containers closed.
- Do not expose containers to excessive temperatures.

- Fire may produce irritating or harmful decomposition products.

Firefighters should use appropriate protective equipment for the circumstances.

SECTION 6: Accidental Release Measures

Personal Precautions

- Ensure adequate ventilation.
- Avoid skin and eye contact.
- Wear suitable protective gloves.
- Remove ignition sources as a precaution where appropriate.

Spill Procedure

- Contain the spill.
- Absorb liquid material with sand, earth or another suitable inert absorbent.
- Transfer contaminated material to an appropriate waste container.
- Clean the affected area.
- Prevent large quantities from entering drains or watercourses.

Dispose of contaminated materials appropriately.

SECTION 7: Handling and Storage

7.1 Safe Handling

- Use in a suitably ventilated area.
- Avoid contact with eyes.
- Avoid prolonged skin contact.
- Do not eat, drink or smoke while using the product.
- Wash hands thoroughly after use.
- Keep containers closed when not being used.
- Do not transfer into unlabelled containers.

When mixing with metallic powders, also consult the Safety Data Sheet for the powder being used.

7.2 Storage

- Store in the original container.
 - Keep container securely closed.
 - Store upright.
 - Store in a cool, dry, well-ventilated location.
 - Protect from excessive heat.
 - Keep away from food and drink.
 - Keep out of reach of children and unauthorised persons.
-

SECTION 8: Exposure Controls / Personal Protection

Engineering Controls

Provide adequate general ventilation.

Eye Protection

Safety glasses are recommended where there is a risk of splashing.

Hand Protection

Suitable protective gloves are recommended for prolonged or repeated handling.

Skin Protection

Wear normal protective work clothing.

Respiratory Protection

Normally not expected to be required for small-scale brush application where adequate ventilation is provided.

Where vapour, aerosol or mist could be generated, further assessment may be required.

Hygiene Measures

- Wash hands after handling.
 - Do not eat, drink or smoke during use.
 - Remove contaminated clothing.
 - Do not clean hands using solvents.
-

SECTION 9: Physical and Chemical Properties

The following properties require confirmation from the product formulation:

Physical State: Liquid/semi-liquid decorative medium

Colour: To specification

Odour: Characteristic

pH: Not determined

Boiling Point: Not determined

Flash Point: Not determined

Flammability: Not determined

Relative Density: Not determined

Solubility: Not determined

Viscosity: Not determined

SECTION 10: Stability and Reactivity

Reactivity

No specific hazardous reactions known under recommended conditions of use.

Chemical Stability

Expected to be stable under normal storage and handling conditions.

Conditions to Avoid

Avoid:

- Excessive heat
- Direct flame
- Strong ignition sources
- Incompatible chemicals

Hazardous Decomposition Products

Fire or thermal decomposition may produce irritating or harmful fumes.

SECTION 11: Toxicological Information

Complete toxicological data for the formulation are not available.

Normal occupational precautions should therefore be observed.

Potential exposure routes include:

- Eye contact
- Skin contact
- Inhalation
- Accidental ingestion

Repeated skin contact with coating media should be avoided.

SECTION 12: Ecological Information

Detailed ecological test data are not available for the formulation.

As a precaution:

- Avoid unnecessary release to the environment.
 - Do not discharge significant quantities into drains.
 - Prevent entry into surface water and watercourses.
 - Dispose of residues responsibly.
-

SECTION 13: Disposal Considerations

Do not pour significant quantities of product into drains or watercourses.

Unused product and contaminated absorbent materials should be disposed of through an appropriate waste disposal route.

Empty containers containing residues should be treated appropriately.

Follow applicable local and national waste regulations.

SECTION 14: Transport Information

Transport classification cannot be reliably assigned without confirmation of:

- Product composition
- Flash point
- Solvent content
- Relevant transport test data

UN Number: To be confirmed

Transport Hazard Class: To be confirmed

Packing Group: To be confirmed

Environmental Hazard: To be confirmed

SECTION 15: Regulatory Information

The definitive classification of this product under the **GB Classification, Labelling and Packaging Regulation (GB CLP)** must be based on its actual chemical formulation.

Where supplied professionally, any required Safety Data Sheet should conform to applicable UK REACH requirements.

SECTION 16: Other Information

This document provides general product safety information based on the known application of Wrights of Lymm Gilt Wax Medium.

The Wrights catalogue identifies Gilt Wax Medium under product codes:

- **5217-01 – 120 ml**
- **5217-02 – 250 ml**
- **5217-03 – 500 ml**
- **5217-04 – 1 litre**

It is intended for use as a decorative medium, including mixing with metallic/bronze powders.

Important: This document should not be treated as a manufacturer-certified regulatory Safety Data Sheet until the chemical composition and hazard classification have been confirmed.
